DETAILED ACTION

1. Applicant's election without traverse of Group I, claims 1-6 and 14-15, in the reply filed on 01 April 2004 is acknowledged. Claims 7-13 and 16-17 were not canceled and are withdrawn from consideration.

Specification

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Art Unit: 1654

3. Applicants' claim priority as a Continuation-in-Part to PCT/FR00/00112, however, there is no reference to this document or any other priority document in a Cross-Reference Section as is required.

Correction to the Specification is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 3-4 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claims 3-4 are rejected for depending from rejected claims.

7. Claim 15 is rejected for indefiniteness wherein it is unclear exactly what the '[D]iagnostic system' comprises, or what components would be or are necessary to complete the claimed invention. Although there is an intended use of the diagnostic system, this does not lend definitive weight as to required limitations regarding the complete invention.

Art Unit: 1654

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-2, 5 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Godfrey *et al.* (EP 0 181 644, 21 May 1986). Godfrey *et al.* teaches compounds of the genus comprising compounds of General Formula I (claims 1 and 14), including many of the side reacting or protecting groups as are found in claims 2 and 5.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Godfrey *et al.* (EP 0 181 644, 21 May 1986). Godfrey *et al.* suggests general formulas wherein the guidelines for the formulas suggest the compounds of present claim 6 (pages 1-3). Although Godfrey *et al.* does not specifically name the compounds, it would be *prima facie* obvious to one of ordinary skill in the art at the time the claimed invention was made that the compounds could be made

Art Unit: 1654

under the defined limitations of the general formulas for the genus of compounds claimed (pages 1-3), based upon the overall beneficial teachings provided by Godrey *et al.*
